The Security Guidelines ensure that all people working for the organization are protected. They save time, costs and even life. Precautions if implemented correctly can bring more business too. The Security Guide templates should follow some of the main lists. The list should cover general health and safety policies, risk assessment monitoring, safe working procedures, safe working practices, company rules, preventive equipment, maintenance, communications, training, and the like. Other items to be included in the safety manual include - substance abuse prevention, claim management, environmental policy and prevention of back injuries. It is not enough to have a safety manual, and it is even more necessary to form a committee and monitor the safety procedures that follow in all areas of the organization's activities. An example of a codc.govt.nz security guide is designed to keep people working in the organization safe.
